

The Maxillofacial Shield (MFS) is an upgrade to the HGU-56/P helmet system. This protective shield attaches to the helmet and provides superb protection for the lower face from flying debris kicked-up during helicopter operations.

MFS

Maxillofacial Shield

The system comes complete with the face shield, all necessary mounting hardware and instructions for installation on the HGU-56/P helmet. The MFS comes in one size and fits all HGU-56/P helmet sizes.

Features/Benefits of the System:

- Provides superb protection to the lower face from rotor wash, flying debris, and windblast.
- Dual side-release latches provide for positive lock and ambidextrous quick release of shield.
- Shield offers ballistic fragmentation protection up to 550 ft. per sec. (fps), similar to that provided by the helmet visor.
- Substantially improves voice communication by reducing wind noise across the microphone.
- Weighs less than five ounces.
- Interface between shield and visor reduces wind on the face.
- Compatible with Mike Lites™.
- Subdued matte black finish that can be easily painted.

Complete Kit Includes:

- 1 each Maxillofacial Shield.
- 1 each Helmet Side Hardware Kit.
- 1 each Shield Side Hardware Kit.
- 1 each Mounting Instructions.

Part Numbers for Kits:

- Complete Kit88C7626
- Helmet Side Hardware89C7816-1
- Shield Side Hardware89C7816-2
